If anything goes wrong: imade3d.com/support

These guides presume you already have your JellyBOX built.
(With the exception of the HotEnd, which needs to be Hot-Tightened now.)

## Table of Contents

- WELCOME/README
- HowTo Guides TOC
- 3D Printing 101: Flow, STLs and Gcodes
- - Pre-Print 01: Mech-a-tronics Check
    - Power Up and Fans Check
    - Z Motor Adjustment
    - Belt Tension
    - Set Screws and Bolts
    - X homing offset
    - Test X+Y+Z EndStops
    - Test Extruder (E) Motor
    - Magic of Lubrication
    - #prep Hotend: Hot-Tightening
- - Pre-Print 02: Filament Essentials
    - Load/Unload Filament
    - Feeder Spring Tension
    - Note on Gcodes + SD Card Printing
    - USB Printing ?
- - Pre-Print 03: Z Probe Setup
    - Part 01 - Z Probe Setup
    - Part 02 - Nozzle fan height set up
    - Part 03 - 1st layer tweaking
- - Slicing (3D Model Processing)
    - Install Cura Slicer
    - Get JellyBOX Material Presets into Cura
    - Get JellyBOX Slicing Presets into Cura
    - Slicing an STL file in Cura 2.x
  - Downloads: Slicing Profiles
- - Advanced and On-Going
    - Calibrate the Extruder Steps/mm
    - PID tuning - Calibrate the heater

- Upgrading Firmware (= flashing Marlin)
